

Proposed Modeling and Simulation Center for Lawmaking

David G. Schrunk, *Member, IAENG*

Abstract

This presentation discusses the concept of a Modeling and Simulation Center for Lawmaking. The Center will bring the knowledge and expertise of science, engineering, law, economics, sociology, and other relevant disciplines to bear upon the design of laws that effectively solve societal problems. The Center will advance the science of laws, accelerate the transformation of lawmaking into a knowledge industry, and improve the ability of governments to satisfy their public benefit purpose.

D. G. Schrunk is developing the Science of Laws and the Modeling and Simulation Center for Lawmaking as an independent investigator. He is the president of the Quality of Laws Institute, 14341 Horizon Court, Poway, California, 92064. Phone: 858-485-0540; email: david.schrunk@qualitylaws.com.
