IAENG International Journal of Applied Mathematics

Contents: Volume 55, Issue 6: June 2025

Online Version Available: 1 June 2025

JOURNAL PAPERS:

A Modified Liu and Story Algorithm for Solving System of Convex-constrained Monotone Nonlinear Equations with Applications to Signal Recovery

Yogesh Kumar, A.K. Awasthi, and Habibu Abdullahi, IAENG International Journal of Applied Mathematics, 55:6, pages 1454-1465.

The Expected Values of Hosoya Index and Merrifield-Simmons Index of Random Octagonal Chains

Chengshan Peng, and Xianya Geng, IAENG International Journal of Applied Mathematics, 55:6, pages 1466-1475.

Enhanced Solutions to Differential Equations Using Numerical Iterative Approach

Alaa Al-Wadi, Rania Saadeh, Ahmad Qazza, and Ghassan Abufoudeh, IAENG International Journal of Applied Mathematics, 55:6, pages 1476-1482.

A Sustainable Extension System for Chinese Standard Spoken and Written Chinese Language via Three-party Evolutionary Game

Xianfeng Ding, Xiaolin Yi, Qian Chen, Hanbing Mei, Yiyu Qin, Pengfei Wen, and Qianmei Luo, IAENG International Journal of Applied Mathematics, 55:6, pages 1483-1494.

Research on the Smoke Diffusion with New Energy Vehicle Fire in Tunnel under the Action of Fine Water Mist and Longitudinal Ventilation

Zhenpeng Bai, Xiaohan Zhao, Jiali Zhang, Huaitao Song, Hengjie Qin, and Haowei Yao, IAENG International Journal of Applied Mathematics, 55:6, pages 1495-1501.

Indonesia Private Company Stock Price Forecasting Based on Discrete Time Logistic Differential Model

Andree Sulistio Chandra, Viska Noviantri, and Irene Anindaputri Iswanto, IAENG International Journal of Applied Mathematics, 55:6, pages 1502-1511.

Leader-Following Networks under Model Prediction Event-Triggered Control

Jianping Cai, Lijun Gan, and Jianbin He, IAENG International Journal of Applied Mathematics, 55:6, pages 1512-1518.

The Dynamics and Applications of an Optimal Iterative Method

Mani Sandeep Kumar Mylapalli, Navya Kakarlapudi, Virath Singh, Chaganti Pragathi, and Perumali Sundarayya, IAENG International Journal of Applied Mathematics, 55:6, pages 1519-1530.

Quasi-uniform DtN-FE Method for the Exterior Scattering Problem

Hongrui Geng, Quanyu Dou, Guizhong Xie, and Hongbo Guan, IAENG International Journal of Applied Mathematics, 55:6, pages 1531-1537.

Characterization of Almost Interior Ideals and Their Fuzzifications in Ternary Semigroups

Pannawit Khamrot, Wichuda Wongphobchok, Aphitsara Ti-aree, and Thiti Gaketem, IAENG International Journal of Applied Mathematics, 55:6, pages 1538-1545.

Study on the Noise and Structural Parameters of Radiators for Engineering Vehicles

Jie MENG, Xiaolong ZHANG, Hui FENG, Tianshan WEI, and Shangkun SHI, IAENG International Journal of Applied Mathematics, 55:6, pages 1546-1554.

Numerical Eigenvalue Bounds

Pravin Singh, Shivani Singh, and Virath Singh, IAENG International Journal of Applied Mathematics, 55:6, pages 1555-1561.

Research on Personal Credit Scoring Based on Histogram of Oriented Gradient

Fan Liao, Shu Huang, and Wu Jian, IAENG International Journal of Applied Mathematics, 55:6, pages 1562-1570.

Brunn-Minkowski Inequalities of Dual Harmonic Quermassintegrals

Chao Li, and Dandan Ren, IAENG International Journal of Applied Mathematics, 55:6, pages 1571-1575.

Mathematical Modelling of Lung Cancer Growth with Innate Immune Cell Response and The Role of Mesenchymal Stem Cell

Ilham K., and Lina Aryati, IAENG International Journal of Applied Mathematics, 55:6, pages 1576-1587.

Sparse Online Principal Component for Laplace Factor Models

Siqi Liu, and Guangbao Guo, IAENG International Journal of Applied Mathematics, 55:6, pages 1588-1592.

Some New Fixed Ellipse Results and Discontinuity at Fixed Point in Sp-metric Space

Kaushik Lahkar, and Nilakshi Goswami, IAENG International Journal of Applied Mathematics, 55:6, pages 1593-1603.

On the Wiener Index of Graphs with Predetermined Dissociation Number

Ruijin Li, and Jianzhong Cui, IAENG International Journal of Applied Mathematics, 55:6, pages 1604-1608.

Sylvester-Type Matrix Equations over Generalized Quaternions with Applications to Color Image Processing

Janthip Jaiprasert, and Pattrawut Chansangiam, IAENG International Journal of Applied Mathematics, 55:6, pages 1609-1619.

Modified Iteration Algorithm for Solving Absolute Value Equations

Ao Xu, Yage Wang, Yuting Sheng, Minglei Fang, and Weifan Zou, IAENG International Journal of Applied Mathematics, 55:6, pages 1620-1624.

Game-theoretical Mitigating Rules for Sports Injuries under Multiple-effect Training Programs

Hsin-Fu Chen, and Ke-Jung Lin, IAENG International Journal of Applied Mathematics, 55:6, pages 1625-1633.

Stability Analysis for a Lattice Hydrodynamic Model Considering Driver's Characteristic and On-ramp under V2X Environment

Tao Liu, IAENG International Journal of Applied Mathematics, 55:6, pages 1634-1639.

An Introduction to 2-Domination Integrity of Graphs

Christin Sherly J, and Uma Samundesvari K, IAENG International Journal of Applied Mathematics, 55:6, pages 1640-1645.

Power Function-Weibull Composite Distribution for Modeling Lifetime Data

Chao Wang, and Mengni Guan, IAENG International Journal of Applied Mathematics, 55:6, pages 1646-1657.

Machine Learning Classification with Logistic Regression Feature Selection Approach on Health Datasets

J. Pongthao, A. Na-udom, and J. Rungrattanaubol, IAENG International Journal of Applied Mathematics, 55:6, pages 1658-1666.

Multi-period Dynamic Portfolio under Uncertain Exit Time with Novel Parametric Fuzzy Numbers

Zhihua Zhao, Zhi Li, Yongkang Yuan, and Jinjia Lu, IAENG International Journal of Applied Mathematics, 55:6, pages 1667-1684.

Application of Differential Transform Method to Solve Fractional Relaxation Oscillation Equation

Pratiksha Devshali, and Geeta Arora, IAENG International Journal of Applied Mathematics, 55:6, pages 1685-1694.

Optimal Radio Label of the Cartesian Product of Pyramid Network and Even Path

Linlin Cui, and Feng Li, IAENG International Journal of Applied Mathematics, 55:6, pages 1695-1702.

Critical Factors for Proper Implementation of Safety Management System in Construction Projects of Nepal: SEM Approach

Basant Bhatta, Dinesh Sukamani, Kreeti Bajracharya, and Subash Kumar Bhattarai, IAENG International Journal of Applied Mathematics, 55:6, pages 1703-1715.

The Steiner Wiener Index of Bicyclic Graphs

Xiao Wang, and Xian Ya Geng, IAENG International Journal of Applied Mathematics, 55:6, pages 1716-1721.

Power of Mann-Whitney Test Against the Assumption of Symmetry

Jutharath Voraprateep, IAENG International Journal of Applied Mathematics, 55:6, pages 1722-1730.

Stability and Hopf Bifurcation Analysis of a Rumor Propagation Model with Beddington-DeAngelis Incidence and Two Time Delays

Rongrong Yin, and Ahmadjan Muhammadhaji, IAENG International Journal of Applied Mathematics, 55:6, pages 1731-1746.

Consistency of Time-varying Multi-agent Systems with Intervening Directed Topological Connectivity Improved Speed of Analysis and Convergence

Tengfei Wei, Shihua Ma, and Rui Hao, IAENG International Journal of Applied Mathematics, 55:6, pages 1747-1753.

Application of Least Squares Approximation to Predict Sales Outcomes at Bandar Rajut CR04 Bandung Knitted Store

Sri Purwani, Fadiah Hasna Nadiatul Haq, and Nurnisaa, IAENG International Journal of Applied Mathematics, 55:6, pages 1754-1760.

Research on the Coordination Relationship of Transportation, Regional Economy and Eco-environment in Urban Agglomerations

Liangsheng Zhao, Changfeng Zhu, Jie Wang, and Linna Cheng, IAENG International Journal of Applied Mathematics, 55:6, pages 1761-1773.

Explanation of Quasi-Regular Semigroups Characterized in Terms of Neutrosophic Bipolar Valued Fuzzy Ideals in Semigroups

Pannawit Khamrot, Aiyared Iampan, Anothai Phukhaengsi, and Thiti Gaketem, IAENG International Journal of Applied Mathematics, 55:6, pages 1774-1781.

Diagnosability of Lexicographic Product of Wheels and Paths under the PMC Model

Bu Chen, and Feng Li, IAENG International Journal of Applied Mathematics, 55:6, pages 1782-1788.

Fuzzy Generalization of ZZ Transform

Emad A. Kuffi, Samer Thaaban Abaas Alshibley, Rania Saadeh, and Ahmad Qazza, IAENG International Journal of Applied Mathematics, 55:6, pages 1789-1793.

Study on Distribution Hub Pre-site and Robust Carriage of Hazardous Article under Emergency: A Case of Highly Hazardous Medical Articles

Yun Yang, Qingshan Zhang, Bingjie Fan, Yuhe Tian, and Bangna Li, IAENG International Journal of Applied Mathematics, 55:6, pages 1794-1804.

Optimization on Perishables Vehicle Routing Considering Cold Storage Multi-temperature Joint Distribution of Simultaneous Pickup-delivery

Meng Yuan, Haibo Mu, Yuchen Li, Xu Huang, and Huo Chai, IAENG International Journal of Applied Mathematics, 55:6, pages 1805-1814.

Modeling Dynamics of Mutualism in Prey-Prey System with Variable Carrying Capacity in the Presence of Predator

Randy Lee, Kening Wang, and Mohammad Mahbubur Rahman, IAENG International Journal of Applied Mathematics, 55:6, pages 1815-1824.

Model Predictive Control based Portable Sulfur Hexafluoride Inflation System

Zhixun Zhang, Minsheng Du, Liang Hua, Binyuan Shi, Dong Lan, Sangen Ding, and Binwu Zhang, IAENG International Journal of Applied Mathematics, 55:6, pages 1825-1832.

Development of a Decision Support System and Performance Optimization for a Rock Gold Processing Plant Using a Genetic Algorithm

Priya Chaudhary, and Shikha Bansal, IAENG International Journal of Applied Mathematics, 55:6, pages 1833-1843.

Wiener Index of Families of Bicyclic Graphs Obtained from a Tree

Minyu Chang, and Xianya Geng, IAENG International Journal of Applied Mathematics, 55:6, pages 1844-1848.

A One-Dimensional Numerical Simulation of Oil Spill Control in a Coastal Bay Using a Fourth-Order Explicit Finite Difference Method

Teerat Kasamwan, and Nopparat Pochai, IAENG International Journal of Applied Mathematics, 55:6, pages 1849-1855.

Factorization Effect and Empirical Analysis of China's Industrial Carbon Emissions: Based on LMDI Model and STIRPAT Model

Yinping Jia, Longmei Shi, and Wenya Tan, IAENG International Journal of Applied Mathematics, 55:6, pages 1856-1864.

Degree Partition Number of Some Derived Graphs

N. Malathi, M. Bhuvaneshwari, and Selvam Avadayappan, IAENG International Journal of Applied Mathematics, 55:6, pages 1865-1872.

Multi-person Group Walking Behavior Simulation in Urban Pedestrian Street

Junwei Zeng, Shufan Lei, Yongsheng Qian, and Xu Wei, IAENG International Journal of Applied Mathematics, 55:6, pages 1873-1888.

Conflict Regulating under Multitasking Systems

Bo-Yao Wang, and Yu-Hsien Liao, IAENG International Journal of Applied Mathematics, 55:6, pages 1889-1897.

Some Important Inequalities about the Additive Schwarz Preconditioners

Qianfeng Qian, Lingzhi Qian, and Huiping Cai, IAENG International Journal of Applied Mathematics, 55:6, pages 1898-1902.

Locally D-optimal Design for Sigmoid Model with Four Parameters

Tatik Widiharih, Suparti, and Moch. Abdul Mukid, IAENG International Journal of Applied Mathematics, 55:6, pages 1903-1908.

Region Control of a Family of C-1 Rational Trigonometric Interpolation Spline Surfaces

Yixin Liu, and Yuanpeng Zhu, IAENG International Journal of Applied Mathematics, 55:6, pages 1909-1915.
