Checklist of a camera-ready paper

Last updated date: 20 February 2023

Do not simply copy and paste the prepared content to the template. This method overrides the format of the given template and should not be used.

Only papers satisfying the required format will be processed. Please check the paper against the following list before submitting the paper.

Please ensure that your reference information is correct and in proper format. For the reference format of our publications, please refer to [30] to [35] of the reference section of the MS word template.

The submitted works must represent the authors’ contributions and must not be copied or plagiarized in whole or in part from other works. If the authors have used the work and/or words of others, this has to be appropriately cited or quoted. The authors must disclose all and any actual or potential conflicts of interest with their work or partial benefits associated with it.

Copyright issue: For a paper that contains any materials under copyright, the author himself/herself is responsible for obtaining permissions to any such materials under copyright.

Paper Setting

[1010] The paper size is A4 and all pages are portrait. If a page is landscape, please rotate it 90° anticlockwise.

[1013] The paper is printed in BLACK AND WHITE only. Do not use colours to differentiate/highlight anything.

[1015] No cover page/blank page

[1016] No unnecessary blank area. Please fill in the blank area with the paper content.

[1020] The margin area should be blank. Anything in the margin cannot be printed properly. Don’t put anything such as paper title, page numbers, headers, footers, texts, figures, tables, etc. Remove any header/footer. Even it seems to be blank, its space and etc will make the margin wider.

[1021] No page number.
See the following figure for the page setup of the WHOLE paper (“Apply to” should be set to Whole document). The dimensions are in inches.

The paper is in **two-column style**, except the paper title and the author name(s).

The spacing between the two columns is 0.2 inch and the two columns should be equal in width.

Use **Times New Roman** as the font type for the whole paper.
The first page is like the below figure:

Please refer to the appendix (the first page of the MS word paper template) at the end for example.

Alignment
Centre : Paper Title, Author Names, Section Headings
Justified : Paper Content, Reference

One file only. Do not separate the paper into several files.

Do not use any page/section break unless it is necessary. If you use it, you must check [1016], [6015], [6050] as well.

Suppose something (e.g. table/figure/equation) is too large, you can use the 1-column style for it instead. It should not be put in the middle of the page. Please put it either on the top or bottom. See [1080] and [1095] as well.

If there are many 1-column style figures/tables, place group them together at the end of the content and before the reference part to avoid distorting the flow of the paper. See [6015] as well.
**Paper Title**

[2010] Use font 24, not bold, not italic, centre, single line spacing. No sub-title. No full stop at the end.

[2020] Use both capital letters and small letters, with Each Initial Letter Capitalized (Note: prepositions and articles should be lowercase, except the first word)

For example

<table>
<thead>
<tr>
<th>Paper Title</th>
<th>Correct Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preparation of Papers in Camera-ready Format</td>
<td>Yes</td>
</tr>
<tr>
<td>PREPARATION OF PAPERS IN CAMERA-READY FORMAT</td>

</tr>
</tbody>
</table>

[2030] The paper title should be in the characters below.

0-9
A-Z
a-z
Space
_
,
.
;
`
`
+
=
/
<
>
(
)

Do not use characters such as

- Subscript / Superscript, e.g. $C^1$, $n^2$, CO$_2$, H$_\infty$, etc.
- European letters, e.g. Š, ô
- Greek letters, e.g. $\alpha$, $\theta$, $\pi$, etc
- Mathematical symbols, e.g. $\sum$, $\neq$, etc
- Other symbols, e.g. ®, TM, ¥, £, etc
- Double Quotation Mark, i.e. “

[2040] Do not use any paper sub-title. Please integrate it to the paper title.

[2050] Is the paper title correct / complete?
Paper and Author Information

[3010] Place author names only under the paper title. Use font 11, not bold, not italic, centre, single line spacing. No comma at the end.

Do not put other things such as

- Title, e.g. Prof., Dr, Mr, Ms, etc
- Award, e.g. PhD, Msc.
- Author sequence, e.g. First, Second, 1, 2, ..etc
- Alternative name
- Author details. See [3030]

[3015] The author names under the paper title should be separated by comma. There should be no comma within an author name.

[3020] Leave one line space between the paper title and the author names.

[3025] Leave one line space between the author names and the paper content.

[3027] Leave one line space between the paper content and the paper information & author information part on the first page.

[3029] Avoid any line space inside the paper information & author information part.

That is, please use

XXXXXXXXXXXXXXX
YYYYYYYYYYYYYYY
ZZZZZZZZZZZZZZZZZ

Instead of

XXXXXXXXXXXXXXX
YYYYYYYYYYYYYYY
ZZZZZZZZZZZZZZZZZ

[3030] The author details are compulsory and are arranged in the left-bottom of the first page (not in the margin area). Please leave some space between it and the paper content. Use font 8, not bold, not italic, justified, single line spacing. Please refer to [1060] for the proper position and format. See [3032], [3035] as well. Please refer to the appendix (the first page of the MS word paper template) at the end for example.

[3032] The author details must include the affiliation, role in the affiliation, country, contact email of each author. For each author, please list the information in new paragraph to make it clear. Please refer to [3035] and the paper template for the proper position and format. All information is current and there is no need to add something like currently, now and etc. Please refer to the appendix (the first page of the MS word paper template) at the end for example.

[3033] Please check the use of the preposition in the author details.

[3035] The author details show one current position and contact only. It is not for any research interests, educational background or past working history like the bibliography. If you want to add such details or show more than one current position for any author (e.g. many roles / working in two universities), you can add a section, Bibliography, after the reference section instead.
Abstract

[4010] Use font 9, bold, not italic, justify

[4020] Avoid quoting any references and URLs in the abstract.

[4030] Make it concise. It should be within 350 words.

[4040] The content of the abstract comes after “ABSTRACT –“ (see [1060]), i.e.

ABSTRACT - This paper is …

Instead of

ABSTRACT -
This paper is …

Index Terms

[5010] Use font 9, bold, not italic, justify

[5020] Leave one line space between the abstract and the index terms.
Content

[6010] Use font 10, not bold, not italic, justify for general content.

[6012] See the below for the paragraph setting.

[6013] The indentation of all paragraphs should be consistent.

[6015] The flow of the content starts from the left column, then the right column of the same page, and then the next page, and etc.

[6017] Please only enlarge the first letter of the first paragraph of the first section.

[6020] Use section headings (Use font 10, not bold, not italic, centre, all capital letters and numbered in Roman, i.e. I, II, III, ….), e.g. I Introduction. No colon at the end.

[6021] Leave one line space before section headings.

[6025] Check to ensure the correctness of the sequence of the section numbers and the consistence of the format.

[6027] Some section headings are without section numbers. Please add them back.

[6030] Avoid using blurred equations. Ask a third party to read the page in actual size (no enlargement) from the screen and/or the printed version to see whether he can read the page clearly without guessing.
[6035] There are some strange symbols in the equations. Please check to see whether they are valid.

[6040] For any bulleted/numbered list, the format should be consistent, e.g. the style, the line spacing, etc.

[6050] Check to ensure the correctness of the number sequence of all sections / figures / tables / equations / lists / references and the corresponding numbers in the paper content, especially after any changes, e.g., inserting a section, adding a new figure, deleting a table, changing the sequence of equations, swapping items in a list, rearranging the references, making section break, etc.

[6060] Usually, it is better to use a concise format to represent a number, e.g. 2139.7 instead of 2139.723434 and 0.0987 instead of 0.09866123.

**Tables and Figures**

**General**

[7010] Give a label to each figure/table. See [7020], [7030] and [7040] as well.

[7015] Do not use other terms such as algorithms, charts, diagrams, flowcharts, lists, graphs, pictures, etc for figures. Please check [7075] as well.

[7020] Each label should be numbered and with a brief description. The description should be a noun or noun phrase. Please put further information in the paper content instead. Please refer to the paper template for examples.

[7025] Each label should be typed on the paper, not on the image.

[7070] Check to ensure the correctness of the sequence of the label numbers and the consistence of the format (see [7030] and [7040]).

[7075] Check to ensure the correctness of the label numbers and the corresponding numbers in the paper content.

**Position**

[7030] Figure labels should be under the corresponding figures and the label numbers should be in Fig 1, Fig 2, Fig 3, Fig 4, etc.

[7040] Table labels should be above the corresponding table and the label numbers should be in Table I, Table II, Table III, Table IV, etc.

[7060] Arrange a table/figure and its label in the same column/page if possible. See [1016] as well.

[7080] Leave a line space between each figure/table and the content.

[7095] Do not insert a figure/table inside a paragraph. Please do it before or after a whole paragraph.
Avoid using blurred tables/figures (including all texts, especially those with subscript/superscript, e.g. \( n^2, \text{CO}_2, \text{H}_\infty, \) etc.). All texts must be clear and the resolution of all images must be high enough.

Even high-resolution figures are used, the content may still be too small for reading because of the size of the figure. Please ask a third party to read the page in actual size (no enlargement) from the screen and/or the printed version to see whether he can read it clearly without guessing. See [1090], [7051], [7052], [7054] as well.

For the figure below, it is impossible to read the texts and the symbol labels.

Solution 1: enlarge the figure so that all content can be read in actual size (no enlargement).

Solution 2: add the texts on the figures to indicate the content clearly so that all content can be read in actual size (no enlargement). This method is very suitable if you cannot produce the image again since you can add on something important on the top of the image.
Do not stretch the image without consideration its resolution and proportion.

If the resolution of the image is not high enough, the texts will become blurred after stretching. Please modify them by enlarging the texts in image, not simply stretching the image.

Improper proportion will distort the content, e.g. changing the shape of the item, making it difficult to read the texts.

Please use the figures in proper size.

CASE A

Please cut unnecessary blank outer boundary, e.g. Suppose the pink color is the boundary of the image. Please use image I instead of image II.

CASE B

Suppose there are many sub-figures in a figure, please arrange them into several rows instead of a single row/ a few rows before enlarging the sub-figures as much as possible. In this way, the content will be clearer. If the content is still not clear, you need to consider [1090].

The items in a figure/table should be differentiated easily. You can use colour images but the colour should not be used to differentiate items since the paper is printed in BLACK AND WHITE only. You can use

- different clear patterns ( similar patterns should not be used to avoid any confusion ). See [7055] as well.
- different symbols ( symbols should be large enough and not overlapped ). See [7055] as well.
- colours in different clear grey levels ( similar grey levels should not be used ). See [7055] as well.
- pointers with descriptions. See [7054] as well.

Please ask a third party to read the page in actual size (no enlargement) from the screen and/or the printed version to see whether he can differentiate different items without guessing.
Please use pointers with description (see the figure below)

You are advised to use pointers with description if there are many items (over 3 items) or the patterns are too similar without enlargement. Otherwise, the items are not differentiated easily.

You are advised to use pointers with description if the items are not differentiated easily and/or the texts inside cannot be changed. This method is very suitable if you cannot produce the image again since you can add on something important on the top of the image.
Items in a table/figure should be labelled clearly. The item patterns should be shown fully with their names/simple description so that the corresponding items in the figure can be recognized easily. The texts and patterns should be large enough for clear reading.

It is difficult to identify the patterns of the figure below.

![Daily Sales](image)

Please use larger item labels to show the patterns clearly.

![Daily Sales](image)

There are unnecessary colour lines under some texts in the table/figures. Please remove them.

Do not use background colour, e.g. for table cells or figures, unless it is necessary and can be printed clearly. See [7053] as well.
Some contents in a table/figure cannot be displayed/merged together.

Suppose some data merged together, please make a “zoom in” figure it to show the difference.

Please select the important information instead of putting a large amount of data in the work.
Appendix and Acknowledgement

[8010] Appendix is optional. If it is needed, put it after the content and before the acknowledgement and the reference.

[8020] Acknowledgement is optional. If it is needed, put it before the reference.

[8030] No section number, font 10, centre
i.e. “APPENDIX” only, not “V. APPENDIX” or “APPENDIX:”
i.e. “ACKNOWLEDGEMENT” only, not “VI. ACKNOWLEDGEMENT” or “ACKNOWLEDGEMENT :”

[8035] Use font 10, justified

[8040] Sponsor and financial support acknowledgments are placed just above the author info on the first page, see [1060] for the paper info position and the paper template for writing style, not in acknowledgement.

Reference

[9000] Footnotes should be avoided. Please integrate the information in the paper content and use the reference part instead.

[9010] No section number, font 10, centre
i.e. “REFERENCES” only, not “VII. REFERENCES” or “REFERENCES :”

[9015] Use the term “REFERENCES” for the section heading, not e.g. “BIBLIOGRAPHY” for the reference part.

[9020] Use font 8, justified

[9030] Provide a brief description to each URL, not just place a URL.

[9040] Each reference should be quoted in the paper. Remove any reference which is not quoted.
The format of the references should be

For example, set Indentation of the References in MS Word

<thead>
<tr>
<th>Incorrect: all shifted right</th>
<th>Correct: line Indent same as others</th>

NOT CASE Z: Please format this part consistently. Now, some are fine while some are not.

NOT ...

[9055] Check to ensure the correctness of the sequence of the reference part. It should be in [1], [2], etc. Do not skip any numbers. Please check whether the updated reference part matches the cited references in the paper content.

[9060] Suppose the reference is not in English, please translate it to English (at least the title, the journal/proceedings name, page information, etc). Please put the original reference information after the translated one.

[9070] There is a reference quotation in the table/figure, etc. Only mentioning its source as a reference does not mean that it can be used without permission. If it is yours and does not violate any copyright issue, you can state clearly next to the quotation that it is owned by you.

***You need to inform us how you solve this problem since it is a serious problem.***

Option 1: If you have got the permission from the copyright owner, you need to state clearly that the permission has been obtained and cite it properly in the table/figure label. In addition, please return the permission which has been signed by the copyright owner.

Option 2: Delete the related item from the paper. Please ensure [7075] as well. You can provide the reference of the related item so that people can find it themselves if needed.

Option 3: Redrawing. You must thoroughly understand the meaning after reading the link below https://onlinelibrary.wiley.com/pb-assets/assets/15214117/2056-Copyright-permissions-for-Author-Guidelines.pdf

In this case, you need to state clearly that the version is redrawn based on someone else’s idea and cite it properly. You need to do it in the paper content and the figure label.

[9075] Open access materials do not mean that the authors grant you the copyright. Please refer to [9070] as well.
Please ensure that your reference information is correct and in proper format. Please use the reference format below if you use our journal paper as a reference,

MS Word Problem
[10010] We cannot generate from the given MS word, please send us both the MS word and PDF.

[10020] The PDF generated from the MS word: The equations are blurred. Please send us both the MS word and PDF. Do check the PDF before sending them.

[10030] The positions of the figures/tables are distorted. Please send us both the MS word and PDF. Do check the PDF before sending them.

[10040] The equations are distorted. Please send us both the MS word and PDF. Do check the PDF before sending them.

English Problem
[11010] There are many English mistakes in the paper which are not accepted. Please turn on the spelling and grammar checker and correct all mistakes. In addition, you must ask a technical writer or someone good at English to review the paper and polish the whole paper.

[11020] Please correct all English mistakes like “It are ..”, “They is ..”

[11030] Please use simpler sentence structure. It is hard to follow your paper.

[11040] Please improve the technical writing and presentation of the paper. Please seek the advice from a technical writer or someone good at English to review the paper and polish the whole paper.

Copy Problem
[12010] Suppose you send us a camera-ready paper in PDF which content cannot be copied, you need to submit a version in plain text together.

Abstract—These instructions give you guidelines for preparing papers. Use this document as a template if you are using Microsoft Word 6.0 or later. Otherwise, use this document as an instruction set. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column.

Index Terms—About four key words or phrases in alphabetical order, separated by commas, for example, visual-servoing, tracking, biomimetic, redundancy, degrees-of-freedom

I. INTRODUCTION

This document is a template for Microsoft Word versions 6.0 or later. If you would prefer to use LATEX, download IAENG’s LATEX style and sample files from the same Web page. Use these LATEX files for formatting, but please follow the instructions.

When you open this file, select “Page Layout” from the “View” menu in the menu bar (View | Page Layout), which allows you to see the footnotes. Then, type over sections of the file or cut and paste from another document and use markup styles. The pull-down style menu is at the left of the Formatting Toolbar at the top of your Word window (for example, the style at this point in the document is “Text”). Highlight a section that you want to designate with a certain style, then select the appropriate name on the style menu. The style will adjust your fonts and line spacing. Do not change the font sizes or line spacing to squeeze more text into a limited number of pages. Use italics for emphasis; do not underline.

To insert images in Word, position the cursor at the insertion point and either use Insert | Picture | From File or copy the image to the Windows clipboard and then Edit | Paste Special | Picture (with “float over text” unchecked).

Manuscript received June XX, 20XX; revised July XX, 20XX. (Write the date on which you submitted your paper for review and the last revision date.)

This work was supported in part by the U.S. Department of Commerce under Grant BS123456 (sponsor and financial support acknowledgment goes here).

(The author details must include the current affiliation (one only), role in the affiliation, country of the affiliation and contact email of each author. II. PAPER TITLE

Paper titles should be written in uppercase and lowercase letters, not all uppercase. Avoid writing long formulas with subscripts in the title; short formulas that identify the elements are fine (e.g., "Nd–Fe–B"). Do not write “(Invited)” in the title.

III. AUTHOR LIST

Full names of authors are preferred in the author field, but are not required. Put a space between authors’ initials.

IV. FOOTNOTES

It is recommended that footnotes be avoided (except for the unnumbered footnote with the receipt date on the first page). Instead, try to integrate the footnote information into the text and the reference part.

V. PROCEDURE FOR PAPER SUBMISSION

A. Figures

Format and save your graphic images using a suitable graphics processing program that will allow you to create the images as PostScript (PS), Encapsulated PostScript (EPS), or Tagged Image File Format (TIFF), sizes them, and adjusts the resolution settings.
